

TANDEM / INSTRUCTOR ASSISTED FREEFALL COURSE (T/IAF)

Printer Friendly Version

**Request
Reservation**

Our most popular program. Make your first jump a **120 MPH freefall TANDEM skydive!** The classroom instruction takes approximately 30 minutes. When it is your turn to jump, you and your instructor board the aircraft together for the ride to altitude. After reaching the desired [altitude](#), it is time to freefall with your instructor attached behind you as your personal guide. You will accelerate to over 120 miles per hour for up to 60 seconds. Then **you** can pull the ripcord and enjoy a breath taking five minute flight under your parachute built for two. Yes, these parachutes truly fly and you get to assist your instructor in steering. Thousands of first time jumpers have made tandem skydives with our professional, licensed instructors.

Want to view your **TANDEM skydive** over and over again? You can capture the excitement of your skydive forever and have permanent proof that you jumped! Hire a professional freefall Videographer to photograph and [video tape your skydive](#). As you and your instructor jump from the aircraft, so does your Videographer. This allows him to fly just inches away in freefall to get some great personal photos and video. When making your **TANDEM skydive** appointment, please ask about our [photography services](#).

Want to enjoy your experience with friends and family? We also offer **GROUP RATES**.
